API Integration	HMRC, QuickBooks, Xero, IRIS Elements, HubSpot, Calendly, Stripe, Twilio, GoCardless, FreeAgent, Gusto, Capitalize, Xama
UI Components	DevExtreme dxDataGrid, Bootstrap Modals, Select2
Developer Tools	Git & GitHub, REST APIs
Soft Skills	Problem-Solving, Teamwork, Discipline, Communication

EXPERIENCE

Software Developer — Docusoft Solutions India Pvt. Ltd.

April 2024 – Present

Indore, Madhya Pradesh · UK-based Practice Management Platform (Docusoft)

- Developed and maintained frontend modules for Docusoft, a practice management application used by UK accounting firms, across the full software development lifecycle from design to deployment.
- Integrated 12+ third-party APIs across key business functions: Accounting & Tax (QuickBooks, Xero, IRIS Elements, FreeAgent, Capitalize, HMRC, Xama), Payments & Payroll (Stripe, GoCardless, Gusto), and Scheduling & Communication (Calendly, Twilio, HubSpot).
- Collaborated closely with cross-functional team members to improve problem-solving and communication, building a strong understanding of scalability and performance optimization in a product-based environment.

PROJECTS

Docusoft Practice Management

Tech Stack: HTML, CSS, JavaScript, jQuery

- Built a robust document and task management system designed to streamline workflow efficiency for accounting firms and their clients.
- Enabled users to securely store documents while creating and assigning tasks related to those documents to specific clients.
- Developed a Time Record Management feature allowing precise tracking of time spent by clients on particular documents or tasks, improving productivity monitoring.
- Implemented seamless document sharing with clients, e-signature requests, and document approval on completion.

Docusoft Chat System

Tech Stack: HTML, CSS, JavaScript, React.js, Material UI

- Developed a real-time messaging platform enabling seamless, instant communication between clients and team members.
- Added secure in-chat document sharing so users could exchange files without leaving the conversation.
- Built task- and document-specific discussion threads, keeping team members aligned on ongoing projects.
- Combined integrated communication and file-sharing capabilities to enhance productivity and streamline teamwork.

Docusoft HRM

Tech Stack: HTML, CSS, JavaScript, React.js, Bootstrap

- Built an internal Human Resource Management system to streamline attendance and leave tracking for the company.
- Enabled employees to log daily attendance, review past records, and track break durations for better self-monitoring of work hours.
- Developed a leave management module where employees can check available leaves and apply for future leave requests, with admin review and approval/rejection.
- Designed two dedicated panels: an Admin Panel for monitoring attendance and leave requests across all employees, and a User Panel restricted to an employee's own records.
